**Subject:** Followup Phone call Documentation - Starstone Quarries (Heber Quarry - M/051/001)

I returned a telephone call to Starstone Quarries this afternoon and spoke with Beverly Thomas regarding last weeks call from Lon. Lon had asked for direction on how to seek relief from our request to replace the surety bonds for the Cotton Thomas and Heber Quarries that do not meet our new surety bond criteria. He had also advised that he had completed the required drainage control work at the Heber site and asked if there were any other requirements left unresolved which would prevent us from finalizing our approval of his permit.

I told Beverly to have Lon send us a letter describing what work had been performed, where and when it was completed. I also said to include a formal request for relief from the new bonding requirements as part of the letter. I said we would respond in writing accordingly. She said she would have this letter drafted and sent to our office.

**A copy of this memo should be sent to the Heber Quarry mine file (M/051/001).**
